

Quick-Start Guide: Batch Telemetry Agent

Step 1: Download the Solution

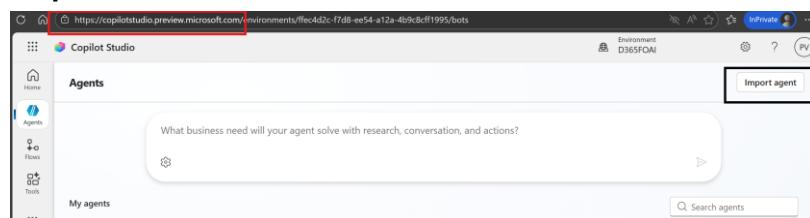

- Navigate to GitHub: [Dynamics-365-FastTrack-Implementation-Assets/AI ERP Agents/Batch-Framework-Telemetry-Agent at master · microsoft/Dynamics-365-FastTrack-Implementation-Assets](https://github.com/microsoft/Dynamics-365-FastTrack-Implementation-Assets/tree/main/Agents/Batch-Framework-Telemetry-Agent)

Step 2: Import the Solution

- Use one of these options:
 - **Power Apps Maker Portal**

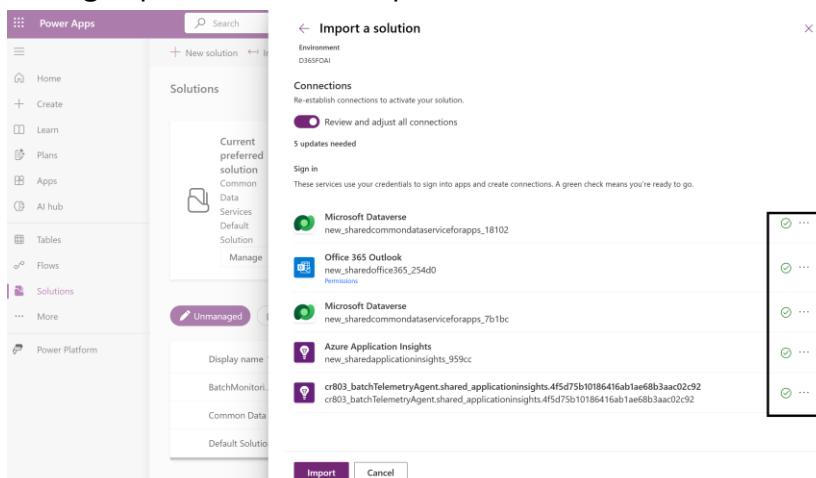

- **Copilot Studio**

Step 3: Verify Connections

- During import, ensure all required connections are established.

Step 4: Publish Customizations

- After importing, you'll see **42 components**.

The screenshot shows the 'Objects' section in the Power Apps studio. A search bar at the top right contains the text 'Publish all customizations'. Below it, a button labeled 'BatchMonitoringAgent_Solution > All' is highlighted. The main list displays 42 components, including '4 hour Batch Jobs Analysis', 'Azure Application Insights', and 'Batch Job Id Telemetry'.

- Publish all customizations.

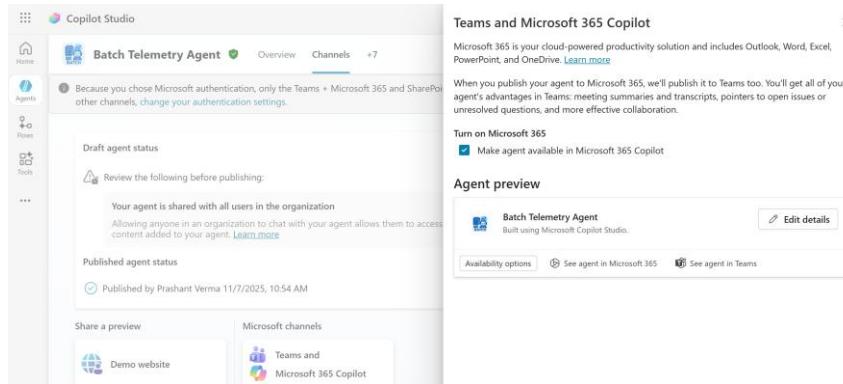

Step 5: Manage Connections

- Once the agent is imported, click **Manage Connections** to confirm everything is properly linked.

The screenshot shows the 'Copilot Studio' interface with the 'Batch Telemetry Agent' selected. On the left, there's a sidebar with 'Agents', 'Flows', 'Tools', and a '...' button. The main area has tabs for 'Overview', 'Knowledge', 'Tools', and 'Analytics'. In the 'Overview' tab, there's a 'Test' button. A context menu is open over the 'Test' button, with 'Manage connections' highlighted. Below this, a 'Manage your connections' section lists four connections: 'Azure Application Insights', 'Microsoft Learn Docs MCP', 'Get Telemetry for Batch ID', and '4 hour Batch Jobs Analysis', each with a status indicator and a 'Manage' link.

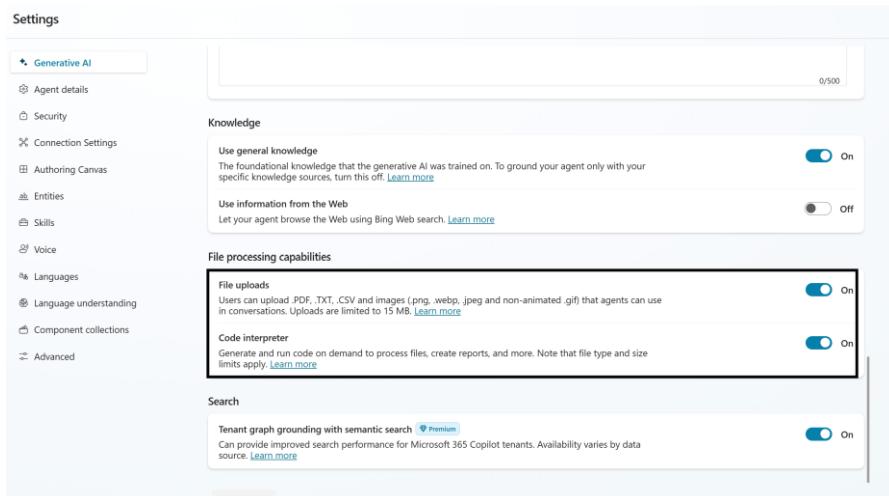

Step 6: Enable Channels

- Go to **Channels** and enable:
 - **Teams**
 - **Microsoft 365**

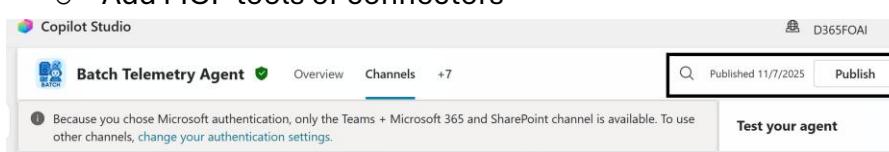

Step 7: Enable Code Interpreter and File processing capabilities feature

- Go to **Settings** and enable:

Step 8: Republish After Changes

- If you modify any of the following, republish the agent:
 - **Topics**
 - **Instructions**
 - **Switch model to Chat GPT-5**
 - **Add triggers**
 - **Add MCP tools or connectors**

Tip: Keep this checklist handy for quick setup and updates!
